## **SECTION 4:** First aid measures

#### · 4.1 Description of first aid measures

• General information:

If health disorder happens, call for medical help immediately. Immediately remove any clothing soiled by the product.

- After inhalation:
- Supply fresh air and to be sure call for a doctor.

In case of unconsciousness place patient stably in side position for transportation.

- After skin contact: Immediately wash with water and soap and rinse thoroughly.
- After eye contact: Rinse opened eye for several minutes under running water.
- After swallowing: Do not induce vomiting; call for medical help immediately.
- $\cdot$  4.2 Most important symptoms and effects, both acute and delayed
- No further relevant information available.

• **4.3 Indication of any immediate medical attention and special treatment needed** *No further relevant information available.* 

## **SECTION 5: Firefighting measures**

- · 5.1 Extinguishing media
- Suitable extinguishing agents: CO2, alcohol resistant foam, powder, water spray.
- · For safety reasons unsuitable extinguishing agents: Water with full jet
- 5.2 Special hazards arising from the substance or mixture

In case of fire, the following can be released: Carbon monoxide (CO)

Carbon dioxide (CO2)

Smoke and soot

Do not use water with full jet to prevend fire spreading.

- · 5.3 Advice for firefighters
- Protective equipment: Wear self-contained respiratory protective device.
- · Additional information
- Cool endangered receptacles with water spray.

Collect contaminated fire fighting water separately. It must not enter the sewage system.

(Contd. on page 4)

Version number 1.01 (replaces version 1.00)

Revision: 02.11.2021

(Contd. of page 3)

#### Trade name: Grapefruit Oil Pink (ref.-no. 2018.2226)

Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

## **SECTION 6:** Accidental release measures

· 6.1 Personal precautions, protective equipment and emergency procedures Follow safety measures in chapter 7 and 8. Wear protective equipment. Keep unprotected persons away. · 6.2 Environmental precautions: Do not allow to penetrate the ground/soil. Do not allow product to reach sewage system or any water course. Inform respective authorities in case of seepage into water course or sewage system. Do not allow to enter sewers/ surface or ground water. · 6.3 Methods and material for containment and cleaning up: Wipe up little amounts with absorbent material like cloth or pulp. Water and cleansing agent Absorb with incombustible liquid-binding material (sand, diatomite, universal binders). Dispose of contaminated material as waste according to item 13. Ensure adequate ventilation. 6.4 Reference to other sections Keep ignition source away, do not smoke and avoid flames. See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment.

# See Section 13 for disposal information.

## **SECTION 7: Handling and storage**

- 7.1 Precautions for safe handling personal protection equipment see point 8. Ensure good ventilation/exhaustion at the workplace. Prevent formation of aerosols.
- Information about fire and explosion protection: Fumes can combine with air to form an explosive mixture. Moistened solids (e.g. cloth, pulp, filter panel, binder) has to be stored hermetically sealed and/or watered and proper disposed (see chapter 9 and 13). Keep ignition sources away - Do not smoke. Protect against electrostatic charges.
- · 7.2 Conditions for safe storage, including any incompatibilities
- · Storage:
- *Requirements to be met by storerooms and receptacles:* Store only in unopened original receptacles. Provide solvent resistant, sealed floor.
- · Information about storage in one common storage facility: Store away from oxidising agents.
- Further information about storage conditions: Keep container tightly sealed.
- Store in cool, dry conditions in well sealed receptacles.
- Storage class: 3
- · Classification according to Betriebssicherheitsverordnung (BetrSichV) Flammable liquid
- 7.3 Specific end use(s) No further relevant information available.

• Additional information: The lists valid during the making were used as basis.

- · 8.2 Exposure controls
- · Appropriate engineering controls No further data; see item 7.
- · Individual protection measures, such as personal protective equipment
- $\cdot$  General protective and hygienic measures:
- *Use personal protective equipment depending on concentration and amount of hazardous substance. Keep away from foodstuffs, beverages and feed.*
- Immediately remove all soiled and contaminated clothing

Wash hands before breaks and at the end of work.

Avoid contact with the skin.

Avoid contact with the eyes and skin.

#### · Respiratory protection:

Suitable respiratory protection: filter class A2 (brown colour).

Use the rules for application of respiratory protection systems.

In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device.

#### • Hand protection

Preventive skin protection by use of skin-protecting agents is recommended.

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation

• Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.

· Penetration time of glove material

> 480 minutes at layerthickness of 0,425 millimeter (Sol-Vex 37-695/Ansell).

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

• For the permanent contact gloves made of the following materials are suitable: Nitrile rubber, NBR

E.g. following product: Sol-Vex (37-695) from Ansell.

- $\cdot \mathit{As}$  protection from splashes gloves made of the following materials are suitable:
- Nitrile rubber, NBR
- · Eye/face protection

Tightly sealed goggles according to EN 166:2001

· Body protection: Protective work clothing

9.1 Information on basic physical and chemical	properties
General Information	
Physical state	Fluid
Colour:	Yellow - red/orange
Odour:	Characteristic
Odour threshold:	Not determined.
Melting point/freezing point:	-74.3 °C
Boiling point or initial boiling point and boiling	
range	>35 °C
Flammability	Not applicable.
Lower and upper explosion limit	
Lower:	0.7 Vol %
Upper:	6.1 Vol %
Flash point:	51 °C (ASTM D7094)
Auto-ignition temperature:	Product is not selfigniting; but in case o
0	unpropitious storing conditions (air admission
	heat accumulation) selfignition is possible fo
	moistened solids (e.g. cloth, pulp, filter panels
	binder).
Decomposition temperature:	Not determined.
pH	Not determined.
Viscosity:	
Kinematic viscosity at 40 °C	<18 mm <sup>2</sup> /s
Dynamic:	Not determined.
Solubility	
water:	Not miscible or difficult to mix.
Partition coefficient n-octanol/water (log value)	
Vapour pressure at 20 °C:	2.3 hPa
Density and/or relative density	
Density at 20 °C:	$0.85 \ g/cm^3$
Relative density	Not determined.
Vapour density	Not determined.
9.2 Other information	
Appearance:	
Form:	Fluid
Important information on protection of health	
and environment, and on safety.	
Ignition temperature:	255 °C
Explosive properties:	Product is not explosive. However, formation of
Expressive properties.	explosive air/vapour mixtures are possible.

## SECTION 10: Stability and reactivity

· 10.1 Reactivity No further relevant information available.

#### · 10.2 Chemical stability

- · Thermal decomposition / conditions to be avoided:
- Heating causes vaporisation and formation of ignitable atmosphere is possible.
- · 10.3 Possibility of hazardous reactions
- Formation of explosive gas mixture with air possible.

Product is not selfigniting; but in case of unpropitious storing conditions (air admission, heat accumulation) selfignition is possible for moistened solids (e.g. cloth, pulp, filter panels, binder). Reacts violently with oxidising agents.

- · 10.4 Conditions to avoid No further relevant information available.
- 10.5 Incompatible materials: No further relevant information available.
- · 10.6 Hazardous decomposition products:

No dangerous decomposition products expected by intended use.

## SECTION 11: Toxicological information

 $\cdot$  11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

• Acute toxicity Based on available data, the classification criteria are not met.

· LD/LC50 values relevant for classification:

5989-27-5 (R)-p-mentha-1,8-diene

Oral LD50 4,400 mg/kg (rat)

80-56-8 alpha-Pinene

Oral LD50 500 mg/kg (ATE)

(Contd. on page 9)

<sup>-</sup> DEN

Printing date 10.11.2021 Version number 1.01 (replaces version 1.00)

Revision: 02.11.2021

(Contd. of page 8)

#### Trade name: Grapefruit Oil Pink (ref.-no. 2018.2226)

· Skin corrosion/irritation

May cause photoxic effects.

Causes skin irritation.

• Serious eye damage/irritation Based on available data, the classification criteria are not met.

· Sensitisation: May cause an allergic skin reaction.

· Germ cell mutagenicity Based on available data, the classification criteria are not met.

· Carcinogenicity Based on available data, the classification criteria are not met.

• *Reproductive toxicity Based on available data, the classification criteria are not met.* 

· STOT-single exposure Based on available data, the classification criteria are not met.

· STOT-repeated exposure Based on available data, the classification criteria are not met.

· Aspiration hazard May be fatal if swallowed and enters airways.

· Additional toxicological information:

• Acute effects (acute toxicity, irritation and corrosivity) Aspiration may cause lung damages.

· 11.2 Information on other hazards

• Endocrine disrupting properties

None of the ingredients is listed.

# SECTION 12: Ecological information

#### · 12.1 Toxicity

## · Aquatic toxicity:

90045-43-5 Grapefruit, ext. (REACH)

LC50 (4 d) 5.65 mg/L (fish)

EC50 (48h) 1.1 mg/L (daphnia)

EC50 (72h) 8 mg/L (algae)

EC10 (72h) 5.1 mg/L (algae)

· 12.2 Persistence and degradability No further relevant information available.

• 12.3 Bioaccumulative potential No further relevant information available.

· 12.4 Mobility in soil No further relevant information available.

· 12.5 Results of PBT and vPvB assessment

• **PBT:** Not applicable.

· vPvB: Not applicable.

· 12.6 Endocrine disrupting properties

The product does not contain substances with endocrine disrupting properties.

· 12.7 Other adverse effects

• Remark: Toxic for fish

• *Remark:* Quantitative data according to the ecological effects are not available.

• Additional ecological information:

· General notes:

Danger to drinking water if even small quantities leak into the ground.

Do not allow product to reach ground water, water course or sewage system.

Also poisonous for fish and plankton in water bodies.

Water hazard class 3 (German regulation) (AwSV 3816; CAS 90045-43-5): severe hazardous for water

Toxic for aquatic organisms

(Contd. on page 10)

#### Trade name: Grapefruit Oil Pink (ref.-no. 2018.2226)

(Contd. of page 9)

## **SECTION 13: Disposal considerations**

· 13.1 Waste treatment methods

#### · Recommendation

Recycling is prefered to disposal or burning.

Disposal must be made according to official regulations.

Must not be disposed together with household garbage. Do not allow product to reach sewage system.

#### · European waste catalogue

02 00 00WASTES FROM AGRICULTURE, HORTICULTURE, AQUACULTURE, FORESTRY,<br/>HUNTING AND FISHING, FOOD PREPARATION AND PROCESSING02 03 00wastes from fruit, vegetables, cereals, edible oils, cocoa, coffee, tea and tobacco

preparation and processing; conserve production; yeast and yeast extract production, molasses preparation and fermentation

02 03 03 wastes from solvent extraction

#### · Uncleaned packaging:

#### · Recommendation:

*Empty contaminated packagings thoroughly. They may be recycled after thorough and proper cleaning.* 

Packagings that may not be cleansed are to be disposed of in the same manner as the product. Moistened solids (e.g. cloth, pulp, filter panels, binder) can be burnt after consulting with the waste disposal facility operator and the pertinent authorities and adhering to the necessary technical regulations.

15 02 02: Filter and absorption materials contaminated with hazardous agents.
